Speed

Who said a large collaborative robot would have to be slow?

The soft highly sensitive AIRSKIN allows fenceless operation at **up to 2 m/s** in free space.

Space

With AIRSKIN a large robot does not need a large fence around it. **Save valuable floor** space to get more productivity out of your facility.

Flexibility

Without fences cluttering your floor space, **quickly reroute material flow** and/or repurpose your robots as demands on your production keep changing.
